

3. End milling machine for aluminum profile(medium) Model: LJDX-200C

Product Feature:

1. It is suitable for milling the end face of aluminum profile, so as to meet the matching between center stile and frame material. It can mill multiple profiles at one time with high efficiency.
2. Three-axis two motors can simultaneously carry 4- 6 cutters.
3. Cutting tools can be adjusted up and down and left and right to adapt to machining with different shapes and sizes.
4. The cutting tool is adjustable, and it is unnecessary to customize the cutting tool when processing different profiles, thus shortening the production preparation, cycle and reducing the cost.
5. The motor phase sequence protector is installed in the circuit system, which improves the safety of the system.
6. Gas-liquid damping device is adopted in the working progress system, which is stable and reliable.

Power supply	380V/50Hz
Total motor power	4.4kW
Motor speed	2800r/min
Operating pressure	0.6~0.8MPa
Motor shaft diameter	Φ32mm
Milling cutter diameter	Φ250mm
Worktable feed stroke	0~1360mm
Open tenon	40mm

Worktable dimension	330×320mm
Motor adjustment stroke	0~85mm
Overall dimension	2240×1020×1670mm
Weight	450kg
