

# TH410B 16" Thicknesser

Designed to handle larger pieces of stock, the 410mm width, gives you the ability to join boards and then thickness them accurately for your projects. A 4mm pass is possible on even the most difficult timbers. TH410B is a heavy but compact sized machine very suitable for a small workshop at home, industrial or club environment.

Diameter 97mm cutterblock for heavy loading and the Helical cutterhead is also option.

Column supported cast table

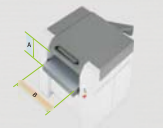

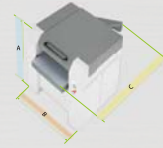

Dust extraction outlet can be mounted in different direction

Integrated guard/dust hood opened from front and easy knives changing
